

I have been an active Amateur Radio Operator for 37 years.
After hearing the interference that results from BPL, PLEASE do
not allow this to happen.
This will completely ruin any chance to have low signal high
frequency communications for ANY radio service.
I am very much interested in being an active Amateur Radio operator
for many years to come.
My 13 year old daughter is also an active Amateur Radio operator.
She has also heard this interference problem and does not want to
see this happen to her new hobby.
Regards,
Richard Saeger K300
